

Comprehensive Audit Program (CAP)

The Comprehensive Audit Program is designed to assist Commercial, Industrial and Agricultural customers to identify solutions that provide the best savings and opportunities for their business.

The following criteria must be met in order to participate in the program:

1. Premise has not had an audit within the last 3 years
2. Has a monthly on-peak demand of 100 kilowatts (kW) or greater for three consecutive months (if multiple meters are present at one premise for one customer, meter usage can be aggregated by premise and customer to meet demand threshold)
3. Currently billed on a commercial, industrial or agricultural Time-of Use rate by SDG&E
4. Customer must have occupied premise for a minimum of 6 months

CAP serves the following sectors & specialty equipment:

Agricultural	Biotech	Commercial
Cold Storage	Food Service	Grocery
Healthcare	HVAC	Industrial
Lighting DR	Lodging	Process
Refrigeration		

The program offers 2 types of audits depending upon the needs of your business:

Category 1 – High Level Audit

- > Documents equipment and identifies energy savings opportunities
- > Includes a full list of all energy consuming equipment at the premise
- > The audit report provides the Customer with high-level estimates of measure costs, energy savings, and payback period sufficient to determine which measures are of interest (these values are estimates based on contractor experience and “rules of thumb”)

Category 2 – Detailed Investment Grade Audit

- > Is limited to only those measures/opportunities Customer selects based on the Category 1 report that the Customer could pursue within 1 year of Category 1 audit
- > Includes full calculations for selected measures, which will be used to determine energy savings, installed costs, incentives, and payback values sufficient for Customers to make decisions to pursue the recommended projects
- > Produces a report and presentation of recommended and actionable options based on Customer requests and requirements

Programs are funded by California utility customers and administered by San Diego Gas & Electric* (SDG&E) under the auspices of the California Public Utilities Commission. Rebates and incentives will be allocated on a first-come, first-served basis, until funds are no longer available or until termination of the program. The On-Bill Financing program may be modified or terminated without prior notice and is provided to qualified customers on a first-come, first-served basis until program funds are no longer available. Eligibility requirements apply.

Note - As an Integrated Demand Side Management (IDSM) program, audit scope and report for both the Category 1 & Category 2 audit includes energy efficiency (EE), demand response (DR), and distributed generation (DG) opportunities.

To get started with your comprehensive audit, contact your Account Executive, call 1-800-644-6133 or complete an audit application and email it to CAP@semprautilities.com
