Advanced EOC Management Section Course

Description

Despite the importance of EOC coordination and planning, there are few resources available for EOC personnel to improve their skills and knowledge in this area. This interactive one-day course provides instruction on the EOC coordination process with a focus on the role of the EOC Management Section in developing the EOC coordination plan. Students receive instruction on the tools and forms that feed the EOC coordination process and are afforded the opportunity to apply their training during hands on activities.

Upon completion of this one-day course, participants will be able to:

- Use the EOC coordination process to create an effective work flow within the EOC.
- Apply the tools and forms used to facilitate EOC planning.
- Understand the activities and meetings required to complete the EOC coordination process.
- Identify the information needed at each stage of EOC planning to conduct effective planning and who, within the EOC, provides that information.
- Understand the inputs and outputs of the Management Section Playbook and the “plays” that comprise the EOC coordination planning process.
